With PV Protector®

PV Protector®

Professional Bird Barrier System for Solar Modules

Safe | Solid | Speedy

Installs in minutes.

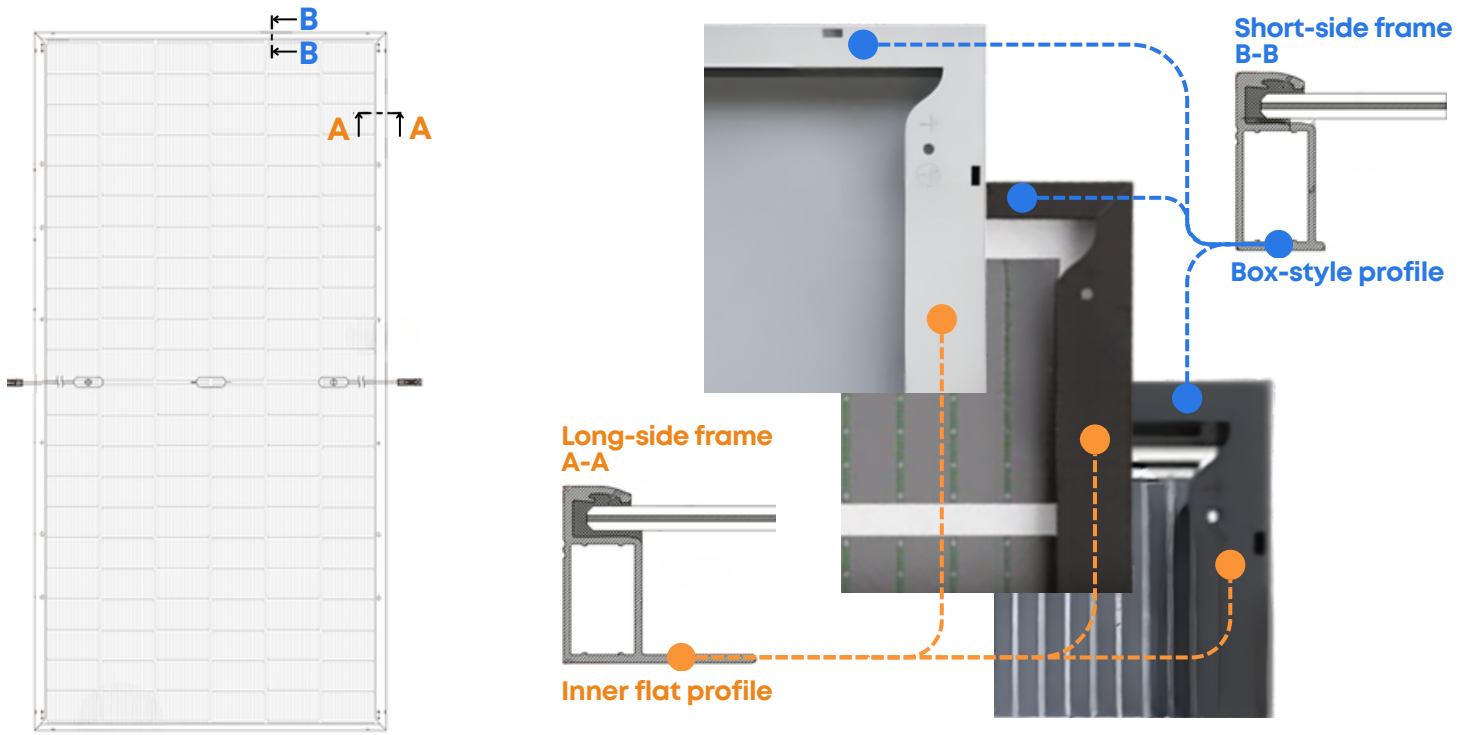

Protects for years.

Tool-free external installation. Zero risk. Zero guesswork.

Different Frames — Complicated Installation

Most solar modules on the market feature a **box-style profile** on the **short-side frames** and an **inner flat profile** on the **long-side frames**.

Common Installer Pain Points

Inventory Complexity → Higher Costs

Multiple Clip Variants → Slower Installation

Blind Under-Panel Work → Safety Risks

Time Lost on Roof → Profit Margin Lost

PV Protector® — One External Solution for Common Frames

Innovative Segment Angle
→ **External-edge installation**

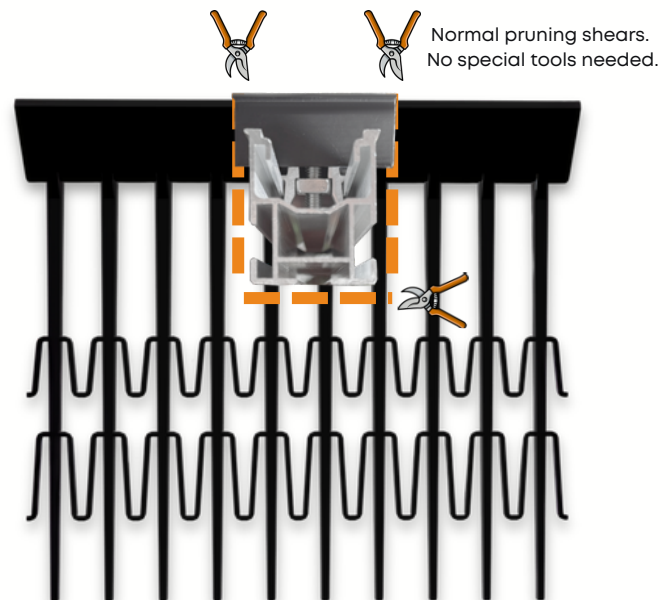

No Reaching Under Panels
→ **Safer. Save up to 38% time.**

Safe

Smart Trimming Design
→ **Mounting rail compatible**

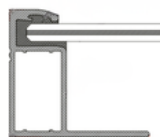

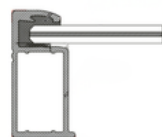

No Gaps, No Weak Points
→ **Full 360° protection**

Solid

Long-side frame

Box-style profile

Inner flat profile

Universal Clip – Long & Short
→ **Fits all standard frame edges**

Tool-Free, External Mounting
→ **Fast installation**

Speedy

PV Protector® — Advantages

- **Simple System**
Easy upsell opportunity.
- **All-in-One Kit**
Simplified inventory. One SKU.
- **Reduced Labour Costs**
Fast external installation. Predictable timing.
- **No Metal Contact**
No scratches or corrosion. No warranty risk.

Traditional Systems — Limits

- ⚠ **Complex Installation**
Specialized tools & training required.
- ⚠ **Frame-Profile Dependent**
Extra parts, variants & costs.
- ⚠ **Unpredictable Labour Time**
Cutting, screwing, drilling, gluing or callbacks
- ⚠ **Sharp Metal Edges**
Risk of frame damage & liability claims.

Become a PV Protector® Partner

Rooftop installation time is precious.
We're proud to protect both your panels —
and the people who install them.
